Product Description

The C_TR1M-45 is designed as a handy, extremely portable to simplify battery charging and ensure quick charger availability whenever and wherever required. It has an elegant appearance the belies its durability and longevity.

This pouch charger has many of the features of a studio charger. A pre-charge function protects heavily discharged cells against high currents until their voltages rise to a safe level. The 4.5A current ensures fast charging of even larger batteries. Short-circuit and protection is also provided. The charger provides a consistent current and voltage during the charging process.

The interface plate is a high quality BLUESHAPE V-mount or 3-stud plate – the same as used on cameras or other devices – attached to a metal plate inserted into a pocket in the pouch to provide a quality interface that lasts for years.
