

M-Mount PRO

Compatible with "m!ka System" Poles

Articulating Camera Mount for Slotted Poles Part# Y20-C02-0

Purpose:

M-Mount PRO from NotaBotYet was designed to allow for quick and easy mounting of small studio cameras in the radio broadcast studio.

To facilitate this, the system was specifically designed to mount in the slot of a standard Yellowtec Mika System Pole.

The Sturdy Articulating Arm is designed to hold a variety of Cameras and even speakers up to 4.4lbs (2KG). Articulation allows for maximum flexibility of camera installation and positioning.

Included in the kit:

- 1 1/4-30 Black Hex Bolt
- 1 Pole Slot Mounting plate
- 1 Articulating Arm

Installation:

Step 1. Insert the bolt through the mounting plate.

Step 2. Slide the bolt and the mounting plate into the slot on the pole.

Step 5. Perform final tightening and adjustments as needed.

Step 7. Mount is now ready to accept a camera on the standard 1/4-20 camera mounting screw.

M-Mount PRO with Camera Mounted
(Camera Not Included)
